

INVESTMENT STRATEGY

The aim is to deliver attractive returns and diversification to traditional portfolios consisting of bonds and equities. The diversification is offered by creating returns independent of the global bond and equity markets.

The investment universe consists of small- and medium-sized publicly traded companies primarily within the Nordics. The investments are event driven and often tailor-made financing solutions consisting of directed share issues, underwriting of rights issues and bridge loans. The investment company has a liquid profile, why the investments must be of reasonably liquid nature.

RETURNS

RISK

← Low risk

High risk →

Typically low returns

Typically high returns

The risk of the fund is calculated based on the volatility of the net asset value since inception.

The risk of the fund will vary, as the sensitivities of the portfolio will change with time, but a risk of the fund, which is similar or lower than that of the global equity market, is targeted. Investors may lose their entire investment. Investors do not take on additional financial commitments in addition to subscribed amounts.
