WHAT IS THIS PRODUCT?

Formue Nord Markedsneutral A/S is an alternative investment fund (AIF). The fund aims to deliver attractive returns. The primary strategy is providing bespoke short-term financing solutions to listed companies in the micro- small and midcap space. The fund e.g., underwrites rights issues, provides short-term bridge loans, or directly partakes in rights issues by exercising subscription rights.

The alternative investment fund can use leverage to enhance the portfolio risk. The fund can use a credit facility of as much as 35% of the fund net asset value, to be fully (100%) invested on a cash basis, measured on a current year basis. The alternative investment fund can hold financial instruments to assume or hedge specific risks. The fund accumulates returns and does not pay out dividends. Formue Nord Markedsneutral A/S is appropriate for long-term investors, who are seeking diversification beyond traditional investment products.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Return-/risk profile

The summary risk indicator is a guide to the level of risk of this product compared to other products. The indicator assumes a 5-year holding period. The product is categorized as 6 out of 7, which is a high-risk class. The primary risk is constituted by a significant part of the product's underlying investments being unlisted, making the risk less transparent. The product's risk may be significantly higher than what is indicated by the summary risk indicator.

The alternative investment fund's risk is intended to be lower than or equal to the global equity market, but the risk may vary over time since the portfolio composition varies.
